

# Carbon Reduction Plan

Supplier name: **Carl Zeiss Ltd**

Publication date: 27/02/2025

## Commitment to achieving Net Zero

Carl Zeiss Ltd is committed to achieving Net Zero emissions by 2050.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any more recent strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year:</b> ZEISS Fiscal Year <b>2019/2020</b> (1 October 2019 until 30 September 2020)	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
In the Baseline Year consumption of energy for Scope 1 and Scope 2 is recorded. For Scope 3; we have used calculated data for fiscal year 2021/2022 and proportioned usage for the baseline year based on turnover. Turnover 2019/2020 is 68.5% of turnover from 2021/2022.	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b> <i>(Rounded to closest whole number)</i>
<b>Scope 1</b>	645
<b>Scope 2</b>	164
<b>Scope 3 (Included Sources*)</b>	577
<b>Total Emissions</b>	1,386

*\*Scope 3 included sources: Business travel; Employee commuting; Waste generated in operations; Upstream transportation and distribution and; Downstream transportation and distribution.*

## Current Emissions Reporting

Reporting Year: ZEISS Fiscal Year <b>2023/2024</b> (1 October 2023 until 30 September 2024)	
EMISSIONS	TOTAL (tCO <sub>2</sub> e) <i>(Rounded to closest whole number)</i>
Scope 1	853
Scope 2	0, based on purchase of Energy Attribute Certificates for 100% of electricity and gas consumption
Scope 3 (Included Sources*)	1070 thereof ~722 tonnes of CO <sub>2</sub> e occurred from employee commuting
Total Emissions	1923

*\*Scope 3 included sources: Business travel; Employee commuting; Waste generated in operations; Upstream transportation and distribution and; Downstream transportation and distribution. Further information regarding the above emissions reporting data is available upon request.*

## Emissions reduction targets

We project that carbon emissions will decrease over the next years. To continue our progress to achieving Net Zero, Carl Zeiss Ltd have adopted the following carbon reduction target(s).

**Scope 1 & 2;** A reduction in Scope 1 & 2 carbon emissions of 59% by Year 2034. This means a reduction to 332 tCO<sub>2</sub>e by 2034 compared to baseline year.

**Scope 3;** A reduction in Scope 3 carbon emissions of 35% by Year 2034, in line with the SBTi Framework for value stream activities. This means a reduction to 375 tCO<sub>2</sub>e by 2034 compared to baseline year.

## Carbon Reduction Projects

The goal of ZEISS Group is to be CO<sub>2</sub>-neutral in its own activities by 2025 (Scope 1 & Scope 2). ZEISS is thus contributing to the global goals of the Paris Agreement to limit global warming to below 2°C. To tackle the value stream emissions ZEISS has set up projects to prepare the participation to SBTi. Carl Zeiss Ltd.'s sustainability initiatives are within the overall framework of the ZEISS group sustainability programme, details of which are available on the group's website.

### *Completed Carbon Reduction Initiatives*

The following environmental management measure has been implemented since the 2019/2020 baseline. The carbon emission reduction in **Scope 2**, achieved by this initiative equates to 164 tCO<sub>2</sub>e, a 100% reduction against the 2019/2020 baseline;

- ✓ Carl Zeiss Ltd has been purchasing Energy Attribute Certificates for 100% of its' electricity and gas consumption since 2021 and continues to do so. With this measure we can avoid 164 tons of CO<sub>2</sub>e on a yearly basis.

The increase of emissions from FY2019/2020 to FY2023/2024 is caused by Carl Zeiss Ltd.'s higher turnover brought about by significant organic growth and company acquisitions. The increase in some reported emissions may also be attributed to the impact of the COVID-19 pandemic during previous years.

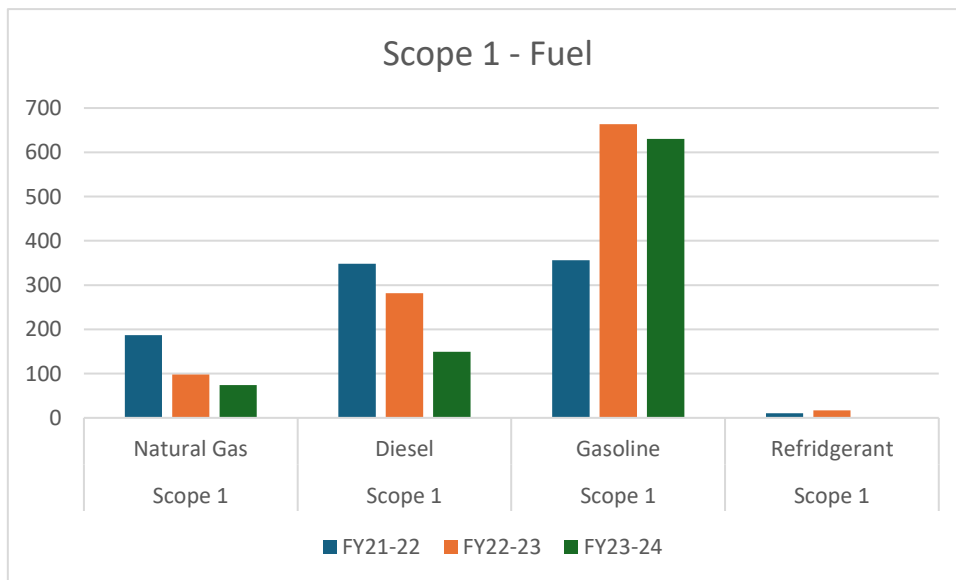

### Fiscal Year 2023/2024 Sustainability Initiatives

Carl Zeiss Ltd shares its building at 1030 Cambourne Business Park with Carl Zeiss Microscopy Ltd, a manufacturer of Electron Microscopes. Carl Zeiss Ltd has maintained a 34% occupation ratio for the basis of Emissions reporting. During the year, the company has implemented the following initiatives:

- The purchase of Energy Attribute Certificates to match the energy consumption which could not be confirmed by the supplier as being 100% from renewable sources.
- Introduced smarter building management for temperature control reducing the energy consumption of the Cambourne heating boilers.

Our reported emissions from employee commuting have decreased significantly ( $\approx 221$  tCO<sub>2</sub>e) compared to Fiscal Year 2022-2023 due to the formal classification of fully remote employees. These employees are not required to work from a ZEISS collaborative hub, which has influenced the commuting journeys factored into reporting calculations, thereby contributing to a reduction in the associated emissions.

The ongoing electrification of our company car fleet has substantially reduced emissions from diesel (Scope 1) since the 2019/2020 baseline. Additionally, we have observed an overall reduction in fuel-based Scope 1 emissions since our last reporting period of FY22-23. As of the date of this publication, approximately 88% of our field-based company cars are hybrid or electric (EV).

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
