

ZEISS CALYPSO 2021

Increase efficiency and productivity

Special Offer for Software Options

ZEISS CALYPSO 2021

With the ZEISS CALYPSO 2021 software release, ZEISS is once again ensuring, with more than 60 new functions, a significant increase in performance in quality control for further time and cost savings in the inspection and analysis of components. Above all, optimizations for automation play a major role in the new software version.

Ihre Vorteile:

- New ZEISS CALYPSO dynamic planning option for dynamic adaptation of the measurement scope
- A multitude of programming optimizations ensures significant time savings
- 20 times faster results thanks to improved free-form and point set calculations
- Measurement time optimization of up to 270 % for optical measurements with ZEISS O-INSPECT

portal.zeiss.com

Are you always looking for new possibilities to maximize the productivity of your systems? Take an extra step forward with ZEISS CALYPSO 2021 and become a [#measuringhero](https://twitter.com/measuringhero) today! Create your own ZEISS CALYPSO software package to maximise your efficiency and productivity while measuring even the most complex parts with your existing systems and **save up to 30%¹⁾** on different ZEISS CALYPSO software options now!

1) Framework agreements and additional discounts cannot be applied.

FREE

ZEISS Smart Services Dashboard

Monitor the performance of your ZEISS metrology solutions in realtime - wherever you are.

Seeing beyond

Available ZEISS CALYPSO Software Options:

ZEISS CALYPSO pallet optimiser

Reducing the frequency of stylus system and sensor changes during pallet measurements.

ZEISS CALYPSO VAST probing

Reduce measuring time by up to 70% for single points measurements.

ZEISS CALYPSO dynamic planning

Allowing a simple adjustment of the measurement scope and CNC sequence based on dynamic rules from MES/CAQ solutions and ZEISS PiWeb.

ZEISS CALYPSO VAST performance

Reduce the time for measuring elements with interrupted contours and fast exchange of stylus systems in CNC modus elements.

ZEISS CALYPSO PiWeb reporting plus

Data evaluation of up to 1,000 measurement runs per inspection plan. Take your data visualisation to the next level.

ZEISS CAD converters & PMI (STEP)

Enabling to save costs and time with effective generation of measurement plans automatically from CAD files.

ZEISS CALYPSO PCM

Parameter Control Manager (PCM) for parametrized creation of inspection plans.

You also have the option to easily get a [free trial of ZEISS CALYPSO 2021](#) out of the [ZEISS Portal](#) at any time to test the ZEISS CALYPSO 2021 software version in your environment¹⁾ with your parts to compare the performance.

ZEISS Smart Services Dashboard²⁾

Monitor the performance of your ZEISS metrology solutions in realtime - wherever you are. The free Smart Services Dashboard provides a clear overview of the key KPIs you need for swift, effective management.

- Overview of the status of all your measuring devices, e.g. monitoring of temperature and collisions of a coordinate measuring machine
- Information about the workload of your coordinate measuring machine
- Transparent planning for the next maintenance and calibration.
- E-mail notification, as needed, when the condition of your coordinate measuring machine changes.
- Ticket creation for troubleshooting - directly via the ZEISS Smart Services Dashboard.
- ...

1) Please be aware that your system requirements needs to be observed. See release note ZEISS CALYPSO 2021
 2) The ZEISS Smart Services Dashboard is free of charge.
