

# Upgrade your system today to Windows 11

## Ready for the future

Seeing beyond

// RELIABILITY  
MADE BY ZEISS

### Upgrade Packages from ZEISS

A comprehensive solution for peace of mind

Is your measuring machine's workstation still running an operating system older than Windows 11? Microsoft is about to discontinue extended support for older operating systems like Windows 10. We now assist you in getting your ZEISS systems Windows 11 ready, regardless of your individual need for a new data system, an update of your ZEISS software, firmware or hardware.

#### Benefits

- Latest CALYPSO update with several enhanced features
- Increased productivity
- Latest CMM controller enabling live CMM monitoring and remote diagnostics
- Comprehensive user support from ZEISS
- Continued Windows support and access to security updates

## Tailor-made upgrade packages

Get your ZEISS systems ready for tomorrow – regardless of your individual need for just a new operating system, or combined with an update of your ZEISS software, firmware or hardware.

Packages	Package 1: Workstation only 	Package 2: Workstation and ZEISS software upgrade 	Package 3: Workstation, Controller and ZEISS software upgrade 
Software	×	✓	✓
