

Quality assurance for foundries

Solutions for every step of the production

When creating cast parts, every step matters. ZEISS is your trusted partner for ensuring the quality of your castings with pragmatic individual solutions that are modularly scalable up to the digitalization of the entire production chain – from raw materials and design to pattern making and raw casting to the finished part. Our quality assurance approach is streamlined and efficient to enable a smooth and productive

workflow, providing valuable data and insights at every step and throughout the entire process. By integrating ZEISS quality assurance into your foundry, you can effectively optimize your process, prevent errors, and create confidence in every finished casting.
