

# Staying protected.

Microsoft Windows® 10 Upgrade  
for your ZEISS CIRRUS, CLARUS and HFA.

ZEISS is fully prepared with Microsoft Windows® 10 upgrades.

Microsoft will end support and security updates for the current Windows 10 Enterprise LTSC 1607 version after October 13, 2026. To help minimize cybersecurity and compliance risks for your practice or hospital, ZEISS offers upgrade solutions for the following ZEISS systems:

- CIRRUS 500/5000/6000
- CLARUS 500/700
- HFA3

Your device remains fully operational after Microsoft ends support. However, the upgrade ensures continued IT security, compliance, and protection against emerging threats.

## Upgrade now to Microsoft Windows® 10 LTSC-Version 21H2 and get:

- Ongoing Microsoft security updates until October 2032 to prevent cyber security and compliance risks.
- A smooth and secure transition to the latest available device software.
- On-site installation by a ZEISS expert to minimize disruptions.

**Act now and stay protected!** Contact your ZEISS representative today and request your upgrade.
