

**MY VISION
IS WORTH IT.**

Why get an OCT Retinal Health Check?

An OCT exam can help assess early warning signs of eye disorders such as glaucoma and macular degeneration.

Vision Loss Simulations

GLAUCOMA
steals your peripheral vision
without warning.

DIABETIC RETINOPATHY
affects a large percentage of people
with diabetes and causes blind spots.

MACULAR DEGENERATION
is a leading cause of severe vision loss in
people over 60, affecting central vision.

Ask your doctor about an OCT retinal health check today.

To reliably assess the health of your eyes, your doctor may recommend a retina evaluation once a year using optical coherence tomography (OCT). An OCT exam is a fast and non-invasive way in which your doctor can assess the health of your eyes.
