

Single-use Lenses for ZEISS RESIGHT

Uncompromised
intraoperative
retina visualization

Seeing beyond

The Single-use Lenses for the RESIGHT® fundus viewing system from ZEISS provide retinal surgeons with a clear and uncompromised view for every surgical procedure in the posterior segment, while also offering all the advantages of disposable lenses. You will benefit from high-resolution visualization of the far periphery, with high light transmission enabling you to operate under reduced illumination intensity.

Smooth workflow and compatibility

All Single-use Lenses for ZEISS RESIGHT are compatible with any ZEISS ophthalmic microscope configured with ZEISS RESIGHT 500 or ZEISS RESIGHT 700, as well as with ZEISS integrated intraoperative OCT.

All lenses are delivered in separate sterile packaging, allowing your OR staff to prepare independently for surgery.

Clear and detailed view for safe macula surgery with the MACULA LENS

- High resolution with an extensive field of view and enhanced contrast
- Better view of surgical instruments during the procedure

Visualization up to the ora serrata with the ULTRA WIDE-ANGLE LENS

- Reduced need for tilting and scleral indentation
- Unobstructed access to the surgical instruments and reduced condensation

Versatility in peripheral surgery with the WIDE-ANGLE LENS

- Adaptability across posterior segment procedures without the need for switching lenses
- Outstanding peripheral visualization in high resolution

Technical Specifications
