DORC TDC VELOCE

“In my recent experience with the DORC TDC VELOCE, the combination of high cut speeds with markedly improved stiffness results in a very stable and predictable performance during complex posterior segment surgery. The enhanced aspiration flow provides better followability, particularly in dense vitreous and PVR cases, allowing for controlled and efficient tissue removal. The synergy of DORC TDC VELOCE with SMART IOP delivers a remarkably steady intraoperative environment, reducing fluctuations and enabling precise manoeuvres even in challenging surgical steps. Overall, DORC TDC VELOCE offers a significant leap forward in safety, control, and surgical efficiency.”
