

ZEISS Training, Education & Best Practice Sharing

Hone Your Microscope Skills and Share Your Experiences

We want you to get the best results and highest benefits from your instruments and systems. We offer training courses with this goal in mind. We also invite you to participate in our user meetings, both so we can learn of your successes and challenges in your day-to-day work, and provide a forum for you to network with other microscopists to exchange best practices.

ZEISS Workshops & Training Courses At Your Facility

Do you have a group of new users that you need to get up-to-speed on your microscopes? Or do you have a group of more advanced users who need specialized training on select techniques or experimental design? Or perhaps you need a combination of both? We offer tailored training courses, designed for your specific needs and equipment, on-site at your facility using your microscopes. Contact us to discuss your needs and receive a quote.

At ZEISS Microscopy Labs

If you are an individual interested in furthering your skills, you may be interested in joining us in one of our facilities for a group workshop specific to your product type and/or application. These intensive workshops review fundamental principles, teach advanced techniques and provide a high level of hands-on time. Visit our website and learn what workshops are available in the next few months. Please contact us if you have any specific requests.

ZEISS User Meetings

Are you interested in networking with other microscopists? Our user meeting topics range from electron microscopy, light microscopy, confocal, superresolution and more. If you have some experience with your equipment and want to engage in this community to learn from your peers and share your knowledge, we encourage you to visit our website and learn about upcoming user meetings.
