**Warning!** Optical class 3 oculars are not intended for long term use.

### Signs at the safety frame:

If protection against high speed particles is required at extreme temperatures, then the eye protector should be marked with the letter 'T' immediately after the impact letter, for example; EN-166-FT. If the letter T does not follow the impact letter then the eye protector can only be used against high speed particles at room temperature. **Warning!** If the symbols S and F are not matching on both the lens and the frame, it is the lower level which is valid for the complete Safety Eyewear (S-class).
